"Passionate React JS Developer, skilled in building dynamic and responsive web applications. Collaborative team player, committed to delivering high-quality solutions."

WORKING EXPERIENCE

React JS Developer - *Global Garner Sales Service Private Ltd.*

September 2021 - Present

I am working as a Frontend React JS Developer with the Global Garner team and am responsible for converting ideas to products using modern technology like, ReactJS, Next JS, JavaScript etc.

- I am working with the Front-end team to design and develop software for the company.
- I worked with the team and developed the Front-end web applications using React, SASS, and Bootstrap, Tailwind CSS, and Redux.
- Collaborated with the development team of the Newsroom projects that are built using Next Js, Redux, and Material UI.
- Designed and developed an Inventory management web application using React, Tailwind CSS.
- Working Experience here is with React Js, Next Js, Redux toolkit, React Hook Form, Tailwind CSS, Material UI, Ant Design, Sass, Modular CSS, Socket.io etc.
- Developed and maintained responsive web applications using React.js, ensuring optimal user experiences on various devices.
- Collaborated with a cross-functional team, including designers and backend developers, to translate project requirements into interactive and visually appealing user interfaces.
- Implemented state management with Redux, enhancing application efficiency and maintaining a clean, organized codebase.
- Optimized application performance through code splitting, lazy loading and other React optimization techniques, resulting in faster load times and improved user satisfaction implemented responsive design principles and CSS frameworks, such as Bootstrap and Material UI, to create visually stunning and user friendly interfaces.

- ★ **Front-End Framework:** React.Js, Redux toolkit, Next.Js, Bootstrap, Tailwind CSS, Ant Design, and MUI.
- ★ **Other Tools:** Figma, Netlify, VS Code, Github, Firebase, Gitlab.

SOFT SKILLS

I'm careful about Communication, Teamwork, Collaboration, Time Management, Confidence, Accountability, humility, creativity, Patience, and Empathy.

PROJECTS

GGCS

Being a part of a digital marketing team means you're contributing to strategies that help businesses establish their online presence and reach their target audiences.

- ❖ Working as a front-end developer means I'm responsible for the user interface and user experience of digital assets. This role typically involves creating interactive and visually appealing websites and web applications that align with marketing goals.
- ❖ Working as part of a development team is an opportunity to collaborate and learn from my teammates. Effective teamwork and communication are essential in achieving project success.

Tools Used: *React Js, Tailwind CSS.*

Flight Seat and Special Services Selection.

I developed a travel flight seat and special services selection with JSON dummy data.

- ❖ Using React JS and Tailwind CSS is a great choice for building a user interface with interactivity and styling. React's component-based structure and tailwind CSS's utility classes can streamline development.
- ❖ Utilizing JSON dummy data is a good practice during the development phase as it allows you to test and refine your application's functionality without the need for a live backend. However, you can consider integrating a real backend or API to Make your application more dynamic and useful in a real-world scenario.
- ❖ Prioritizing functionality is a wise approach, especially when developing an interactive application. Users appreciate an app that works smoothly, and you can always enhance the user interface and design later.

Tools Used: *React Js, Tailwind CSS, React-hook*
